

G99 Training Course

Our one-day training course will bring you up to speed with the latest G99 changes and compliance requirements.

Agenda

The course will cover the following:

- A brief guide to the UK power sector
- Connection process overview
- Brief overview of changes from G59
- Type classification of generators
- Connection arrangements
- Connection application
- Technical studies required from generators
- Generator technical capability requirements
- Overview of forms required for connection
- Compliance and connection processes for each generation type.

G99

Issued in July 2018 by the ENA, EREC G99 encompasses and replaces the long serving EREC G59 with changes to the application process, compliance requirements and commissioning requirements. G99 generators will need to be aware of the new process and requirements.

Suitable for engineers, developers, consultants and students.

Course price: £450 (exc VAT) per delegate.

For group bookings, please get in touch to discuss discounted rates.

Featured courses:

**Connecting Generators to
UK Networks**

**Environmental Noise
Training**

**Environmental Impact
Assessment Training**

**IPSA and Python
Introductory Courses**

100%

of course attendees agreed that the course met their expectations.

"The tutors were really friendly and interactive with all of us. Happy to answer any questions we had and helped us through the content."

"The content was relevant and engaging. The tutor shared his vast experience of wind farm noise assessments during the training which was invaluable."

"Really well presented and thought out training schedule. Very thorough, perfect for electrical engineers."

Courses can either be delivered electronically, at TNEI's offices or at your site.
